

UBAN Series

Direct operated pressure reducing valve

Suitable for:

Air & process gases

Liquids

Steam

Markets:

Oil & gas

Blanketing systems

General industry

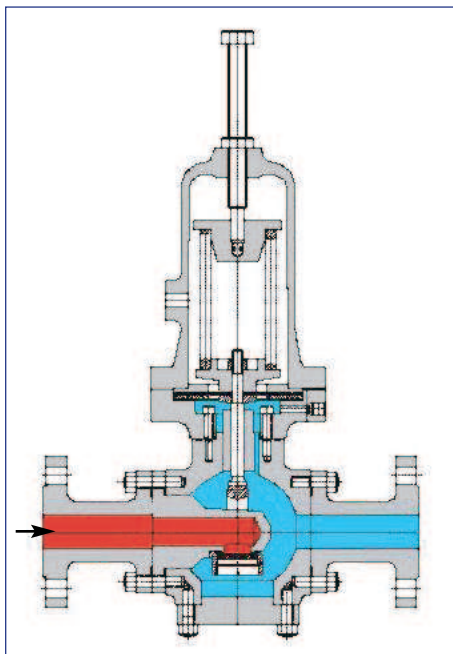

Power

Threaded or Flanged Connections Carbon Steel, Stainless Steel & Alloy Construction

Valve ID card

Function
Reducing
Seat type
Single
Inlet / Outlet diameters
From ½" up to 2"
Body material
Carbon steel, Stainless steel and Exotic materials
End connections
Threaded (F-NPT or GAS/BS) and Flanged (ANSI or PN)
Max rating
ANSI 1500
CV
From 0,031 up to 12,8
Trim materials
Stainless steel (std.) and Exotic materials
Diaphragms
Polychloroprene, EPDM, FKM, Stainless steel, other

The UBAN series are spring loaded direct-operated, pressure reducing regulators.

Their main function is to regulate the outlet pressure. They are available in ½ up to 2 inches (DN15 through DN50) body sizes and can be supplied with a wide range of different end connections. The “bolted” flanged design provides flexibility to meet custom face to face dimensions as required (easy to install / suitable for old valves replacement). These regulators have a compact design and durable construction to sustain rugged use and their construction makes them easy to install and to maintain.

General features:

- Flow to open design
- From 9 to 14 different CV’s for each size to assure high accuracy in regulation
- Metal or Soft Seat (featuring leakage from II to VI, according to Carraro Technical Instruction based on ANSI/FCI 70-3)
- Internal pressure sensing (external on request)
- Packingless construction (available only with internal pressure sensing)
- Different face to face dimensions available (high flexibility in installation)
- Wide range of actuators according to the requested regulation range
- Wide range of elastomeric diaphragms or in AISI 316
- Fully sealed construction available (suitable for dangerous medium; ATEX compliant)
- Balanced construction available for high pressure drops

Special constructions:

- UBAN regulators are also available in special configurations:
- Exotic materials in short lead times (e.g. duplex, superduplex, alloy steel, monel, inconel etc.)
 - Differential versions (with single or double diaphragm) for applications where the differential pressure between two spots has to be controlled and maintained constant
 - HP Body insert for high rating construction (ANSI #900 - #1500)
 - Special welding (BW / SW)

Tab. [1] - Fluid applications

Gas	Air, inert gas, CO ₂ , CO, hydrocarbons, O ₂ , H ₂ , F, NH ₃ , frigorific gas.
Steam	Steam H ₂ O, alcoholic steams, organic steam, sulphuric acid.
Liquids	Water, aqueous solutions, hydrocarbons, alcohol, lubricating oils, diathermic oils, solvents, frigorific fluids, acrylic compounds.

Tab. [2] - Capacities

Nozzle	Body Size									
	½" (DN15)		¾" (DN20)		1" (DN25)		1½" (DN40)		2" (DN50)

Tab. [8] - Temperature range for Diaphragms

Materials	Temperature limits
Chloroprene (CR)	-20 to 90°C (-4 to 194°F)
NBR	-25 to 90°C (-13 to 194°F)
HNBR	-15 to 120°C (5 to 248°F)
Fluorocarbon (FKM-FPM)	-10 to 200°C (14 to 392°F)
Ethylene-Propylene (EPDM)	-35 to 160°C (-31 to 320°F)
Tetrafluoroethylene/propylene (TFE/P)	5 to 200°C (41 to 392°F)
Silicone (VMQ)	-50 to 150°C (-58 to 300°F)
Fluorosilicone (FVMQ)	-50 to 150°C (-58 to 300°F)
Stainless Steel	-196 to 455°C (-321 to 851°F)

Tab. [9] - Temperature range for O-Rings

Materials	Temperature limits
Polytetrafluoroethylene (PTFE)	-200 to 250°C (-328 to 482°F)
Fluorocarbon (FKM-FPM)	-10 to 200°C (14 to 392°F)

Tab. [10] - Temperature range for Metal parts

Materials	Temperature limits
Cast Iron	0 to 232°C (32 to 449,6°F)
Carbon Steel	-29 to 425°C (-20 to 797°F)
Stainless Steel	-196 to 455°C (-321 to 851°F)

Gauge

Safety device on actuator

HP Body for high rating construction

Bolts & Nuts PTFE coated

Optionals:

- Bolts & Nuts PTFE coated or other
- Gauge
- Safety device on actuator
- External pressure sensing
- Bug screen

Special configurations:

- Exotic materials
- Differential valves:
 - D1 single Diaphragm
 - D2 double Diaphragm
- Hp body ANSI #900 #1500
- Special weldings:
 - Butt-weld
 - Socket-weld

■ UB REGULATORS

Spring ranges are based on the following assumptions:

- Stroke from setpoint is $\pm 3\text{mm}$
- Offset max 20% for minimum set pressure
- Low unbalancing forces on the plug

If different operating conditions are required please contact Carraro Technical Dept.

* Thin diaphragm (FKM 0,18mm) and upside down installation.

Upright installation

Upsidedown installation

Tab. [17] - Actuators dimension (quote D)

Actuator	Outer diameter	Surface
	mm	cm ² (in ²)
100	132	9,7 (1,5)
120	132	20,7 (3,2)
130	132	27,8 (4,3)
140	140	64,5 (10)
220	220	226,5 (35,1)
360	360	730,1 (113,2)
515	480	1346 (208,6)

Actuator 100/120

Actuator 130

Actuator 140

Actuator 220

Actuator 360

Actuator 515

UBAN actuators:

The above drawings show all our available actuators, which are perfectly interchangeable the one with the others according to the desired pressure regulation (please refer also to Tab. 4 on page 3). The table below shows the actuators dimensions.

About Carraro

Carraro Srl is a private independent company, operative since 1924 in the field of industrial valves. The firm produces and commercializes worldwide a broad range of industrial pressure regulators, desuperheaters and safety valves for fluids such as steam, process gases and liquids.

The flexible organization of Carraro allows a great customization of the products and the production of “taylor made” constructions. Most of the Carraro’s product range can be realized also in “exotic” materials such as e.g. duplex, superduplex, monel, hastelloy, aluminum bronze and others. Supported by a global network of sales offices, representatives and distributors, Carraro offers a wide range of solutions for the Oil&Gas, the Power industry and all other diversified industrial applications.

Carraro: product range

UB Regulators: direct-operated pressure regulators with compact design

Maxomatic Series: multifunction pilot-operated regulators for liquids

MM-BPM series: direct-operated, spring pressure regulators

AT series: direct-operated temperature regulators

M51 series: direct-operated, weight and lever pressure regulators

CS series: safety valves for vapours, gas, liquids

CSV series: safety valves for steam and gases

VRE series: electrically operated control valves

MCP - ACP series: pneumatically operated control valves

AIRMATIC series: electropneumatic safety valves

DSH series: desuperheaters
